## 藿香茶飲 的故事

緣起——

一起意外造成的右手橈骨骨折，經鄰近熱心婦人提供之藿香葉搗汁敷用治療，縮短了復健時程，並使右手無縫復原一年內順利重拾畫筆，自此激起Nancy研究藿香療效作用機轉之動機。

進入醫研所後便專攻藿香於抗腫瘤與抗發炎之研究，蒐集中外有關藿香藥理作用之文獻報導：除傳統中草藥記載性微溫，歸脾、胃、肺經，可化濕、化痰、解暑、散風寒、健胃、胸悶氣滯外，驚喜發現此一植物鎮痛及抗發炎特性，早經中外醫界實驗證實，而韓國文獻並記載它具有調節身體重要能源（補充元氣、高血壓），對預防腦中風亦有幫助。

Nancy乃積極研發調配藿香茶品，以有機培養土自行栽種完全無農藥之藿香烘焙後，依口味濃淡、植物特性分別調配兼具養身與茗茶樂趣之藿香系列茶品。

Story ——

While Nancy was in rehabilitation of her injured right wrist due to an accident resulted in the fracture of her right radius, a woman living in the neighborhood convinced Nancy applying the Pogostemon Cablin treatment. It really worked and shortened the rehabilitation procedure.

Most important of all, it had Nancy been able to fully recover and restarted drawing within a year. This incident motivated Nancy to further studying the pharmacological mechanism of the PC.

After entering the Medical Institute, Nancy focused on studying the inflammation & anti-tumor mechanism of PC, and then actively developing PC tea series.
